Our core product range includes High Pressure Laminate (HPL), Compact HPL, Prefabricated Class A Fireproof Board, Exterior Anti-UV HPL Compact, Physical & Chemical Resistant Compact HPL, Skin-Touch Fingerprint-Free HPL, DIY Digital Printing HPL, Magnetic Writable Boards, and Class A Fireproof Fiberglass Compact, delivering comprehensive solutions for architectural applications worldwide.

WINFIELD | **Nine** Core Technology

HPL is engineered by laminating melamine-impregnated decorative paper with phenolic-saturated kraft layers under 150°C and 1430 psi. Varying the number of kraft layers produces thicknesses from 1.6mm to 25mm (density: 1450kg/m³). Offering over 10,000 surface patterns, including wood grain, stone, and metal, HPL excels in scratch resistance, surpassing 10,000 Taber cycles, fire resistance, and easy cleanability. Winfield produces 15 million square meters annually, widely used in high-end furniture, countertops, and wall cladding across Asia, the Middle East, Europe, and the Americas.
